

## PRODUCT TECH SHEET

# bio-M®

**\*\* NATURAL OILS AND BOTANICAL EXTRACTS**

### About Bio-M®

**Bio-M®** is a combination of natural oils and extracts.

**Bio-M®** is applied as a foliar spray.

Apply **Bio-M®** after a heavy dew or irrigation cycle to achieve runoff down to the base of the leaf sheath.

**Bio-M®** would be a great addition to any superintendent or turf managers IPM program as a reduced risk input.

It is made from 100% organic components so there is no danger of toxic effects to humans or animals, and has no re-entry period for application.

For more effective coverage and improved results, apply **Bio-M®** with a wetting agent. The preferred wetting agent is **Natural Wet™**.

TURF CARE RANGE

### Guaranteed Analysis

Cottonseed Oil	40%
Clove Oil	20%
Garlic Oil	10%
Sorbitol, Oleic Acid, Lauric Acid, Stearic Acid	30%

### Application Guidelines

Begin **Bio-M®** applications early Spring once temperatures start rising above 20°C, then monthly or as required.

**Bio-M®** can be applied on all turf aspects between October - March (or as required):  
5 - 7 L / Ha.

### Product Handling

Ensure efficient constant agitation during the application of **Bio-M®** as it is an oil and requires constant agitation to remain properly emulsified with water.

Do NOT apply **Bio-M®** when temperatures exceed 28°C.

The best time of the day to apply **Bio-M®** is late afternoon or early morning.

### Compatibility

ALWAYS perform a compatibility test (jar test) before mixing anything with **Bio-M®**.

Do NOT apply **Bio-M®** and **Natural Wet™** with any other product.
