

# ENDURANCE® 15%

## Guaranteed Analysis

Dry Weight Basis	%w/w
Calcium (Ca) as amino acid Chelate	15
Nitrogen (N) as amino acid	3.6

## Product Information

### About Endurance® 15% Ca

**Endurance® 15% Ca** is a patent amino acid chelated product. The chelating agent makes **Endurance® 15% Ca** highly systemic and rain fast within 4 hrs.

**Endurance® 15% Ca** is salt free and is designed for foliar application.

The chelating agent is from the smallest of amino acids, enabling it to pass through stomata and cell membranes more easily compared to other larger molecules.

**Endurance® 15% Ca** is designed for foliar application. Calcium is important for cell wall strength, cell division and elongation.

**Endurance® 15% Ca** is able to be translocated throughout the plant and get to the growing tips of the plants. Calcium is one of the hardest elements for plant uptake, especially during times of heat and cold stress or when root disease pressures and mechanical stresses are prevalent.

Applying **Endurance® 15% Ca** as a foliar bypasses any Calcium lock ups in the soil and delivers a concentrate Calcium source straight to the plant when it needs it.

## Directions & General Recommendations

### Application Rates

ALL TURF ASPECTS

**Foliar application for greens, tees, fairways and sports fields:**

Apply 5kg / Ha a month.  
(Apply with **Fulmax® 3 - 5L / Ha**)

### Product Handling

If the pH of the water is alkaline, add **Fulmax®** first until the pH comes down to 6 - 6.5, then add **Endurance® 15% Ca**.

### Compatibility

ALWAYS run a compatibility test before spraying **Endurance® 15% Ca** with other chemicals.

**Endurance® 15% Ca** is compatible with most fungicides and insecticides.

**Endurance® 15% Ca** is INCOMPATIBLE with Copper, Magnesium, Phosphorous, Trace elements and Potassium products.

KEEP OUT OF REACH OF CHILDREN
