Product Information

About Endurance® 18% Mn

Endurance® 18% Mn is a patent amino acid chelated product. The chelating agent makes **Endurance® 18% Mn** highly systemic and rain fast within 4 hrs.

Endurance® 18% Mn is salt free and is designed for foliar application.

The chelating agent is from the smallest of amino acids, enabling it to pass through stomata and cell membranes more easily compared to other larger molecules.

Endurance® 18% Mn is designed for foliar application.

Manganese plays an important role in chlorophyll production and contributes significantly with root elongation and lateral root formation.

Manganese tends to be insoluble and unavailable in alkaline conditions.

Directions & General Recommendations

Application Rates

ALL TURF ASPECTS

Foliar Application - Greens, tees, fairways and sports fields:

Apply 2 - 4kg / Ha / month
(Apply with **Fulmax®** at 3 - 5L / Ha)

Product Handling

If the pH of the water is alkaline, add **Fulmax®** first until the pH comes down to 6-6.5, then add **Endurance® 18% Mn**.

Compatibility

ALWAYS run a compatibility test before spraying **Endurance® 18% Mn** with other products.

Endurance® 18% Mn is compatible with most fungicides, insecticides and fertilisers. Always do a jar test to confirm.

Endurance® 18% Mn is INCOMPATIBLE with Phosphorous, Calcium and Potassium products.
