

ENDURANCE[®]

Guaranteed Analysis

Dry Weight Basis %/w/w

As true amino acid Chelates:

Zinc (Zn) 8.5%	8.5%
Iron (Fe) 4.25%	4.25%
Manganese (Mn)	5.67%

*Zinc, Iron & Manganese present as Glycine chelates.
0.17% W/V Humic acids present as Potassium Humate*

Product Information

About Endurance[®] ZIM

Endurance[®] ZIM is a patent multi mineral amino acid chelated product. The chelating agent makes **Endurance[®] ZIM** highly systemic and rain fast within 4 hrs.

Endurance[®] ZIM is salt free and is designed for foliar application.

The chelating agent is from the smallest of amino acids, enabling it to pass through stomata and cell membranes more easily compared to other larger molecules.

Zinc, Iron, and Manganese all play an essential role in turfgrass colour, especially in cooler months or when soils, and / or spray water is alkaline. These three trace minerals are essential when chasing greener turfgrass throughout the year.

Directions & General Recommendations

Application Rates

Endurance[®] ZIM may be applied before or at planting through irrigation water. The application rate is 3 - 5kg / Ha depending on crop, soil conditions and application methods.

Monthly greens & tees:

Apply 3 - 5kg / Ha.

Fairways & sports grounds:

Apply 3 - 5kg / Ha.

Product Handling

In conditions where the water and/or soil pH are alkaline, it would be recommended to apply **Fulmax[®]** to the water first before adding **Endurance[®] ZIM** to the tank. To further increase availability, add **Endurance[®] ZIM** to the tank when the pH of the water is 6.5 – 7.5.

Compatibility

ALWAYS perform a compatibility test (jar test) before mixing anything with **Endurance[®] ZIM**.

Endurance[®] ZIM is INCOMPATIBLE with trace elements, Magnesium, and Calcium products.
