

# ENDURANCE<sup>®</sup> MULTI *Trace*

## Guaranteed Analysis

Dry Weight Basis	%w/w
As true amino acid Chelates:	
Magnesium (Mg)	4.1
Zinc (Zn)	4.1
Iron (Fe)	2.6
Manganese (Mn)	2.6
Copper (Cu)	1.5
Boron (B)	1.5
Molybdenum (Mo)	0.5
Nitrogen (N) as amino acid	6.7

## Product Information

### About Endurance<sup>®</sup> Multi Trace

**Endurance<sup>®</sup> Multi Trace** is a patented amino acid chelated product. The chelating agent makes **Endurance<sup>®</sup> Multi Trace** highly systemic and rain fast within 4 hrs.

**Endurance<sup>®</sup> Multi Trace** is salt free and is designed for foliar application.

The chelating agent is from the smallest of amino acids, enabling it to pass through stomata and cell membranes more easily compared to other larger molecules.

Applying trace elements regularly in small amounts helps keep all nutrients topped up within the plant to help maintain constant levels. Adding individual **Endurance<sup>®</sup>** products to **Endurance<sup>®</sup> Multi Trace** may be required to increase certain nutrients which may be deficient at any time during the year.

## Directions & General Recommendations

### Application Rates

ALL TURF ASPECTS

**Foliar Application - Greens, tees, fairways and sports fields:**

Apply 2 - 5kg / Ha / month.

(Apply with **Fulmax<sup>®</sup>** at 3 - 5L / Ha)

### Product Handling

If the pH of the water is alkaline, add **Fulmax<sup>®</sup>** first until the pH comes down to 6 - 6.5, then add **Endurance<sup>®</sup> Multi Trace**.

### Compatibility

ALWAYS run a compatibility test before spraying **Endurance<sup>®</sup> Multi Trace** with other products.

**Endurance<sup>®</sup> Multi Trace** is compatible with most fungicides, insecticides and fertilisers. Always do a jar test to confirm.

**Endurance<sup>®</sup> Multi Trace** is INCOMPATIBLE with Copper, Phosphorus, Calcium and Potassium fertilisers.

KEEP OUT OF REACH OF CHILDREN
