## Product Information

### About Humic80®

**Humic80®** is a 100% soluble humic acid extracted from Leonardite (the best mineral source of humic acid).

**Humic80®** is a highly concentrated source of Carbon.

Applications will increase the uptake of mineral nutrients by plants and contains a high analysis of Oxygen, which promotes root growth and nutrient uptake.

**Humic80®** is an excellent chelating agent as it has the capability of unlocking nutrients within the soil, as well as making applied nutrients highly available.

These features reduce the leaching affect of nutrients on high sand profiles and increasing fertiliser efficiency.

The Humic acid in **Humic80®** has a high water holding and cation exchange capacity (ranges from 150 - 500meq / 100g).

**Humic80®** applications can improve soil particle aggregation, and as a result, can increase soil aeration, tilth and workability as well as providing improved water movement.

## Directions & General Recommendations

### Application Rates

APPLY MONTHLY

**Foliar Application - Greens, tees, fairways and sports fields:**  
Apply 2kg / Ha. Repeat every month.

**Soil Application - Greens, tees, fairways and sports fields:**  
Apply 2 - 5kg / Ha. Repeat every month.

### Product Handling

#### Mixing:

Dissolve **Humic80®** in warm water (if possible) prior to adding to tank.

Use enough clean water to totally dissolve product. Approx 2kg of product will dissolve in 20L of water.

Do NOT use **Humic80®** in acidic soils or acidic water.

### Compatibility

ALWAYS perform a compatibility test before mixing any products with **Humic80®**.

Do NOT mix **Humic80®** with Calcium based products.

**KEEP OUT OF REACH OF CHILDREN**

### Limited Warranty

Manufacturer or reseller makes no warranty, whether expressed or implied, concerning the use of this product other than for the purposes indicated on the label. Neither manufacturer nor reseller shall be liable for any injury or damage caused by this product due to misuse, mishandling or any application not specifically described on the label.
