Product Information

About Penex®

Penex® is a soil conditioner which aids in water penetration, helps reduce runoff, promotes deeper root systems and increases water efficiency.

Penex® is specifically designed to improve soils with a history of poor water penetration. Problem areas in lawns, greens, fairways, sporting fields and potting soils can be corrected by using **Penex®**. It is an excellent wetting agent .

Penex® increases water penetration by breaking up soil particles which may have become locked together through compaction or poor soil structure.

By unlocking these particles **Penex®** increases water penetration, reduces runoff, increases aeration, allows root systems to move down the soil profile, and allows salt to wash out.

General Recommendations

Application Rates

ALL TURF ASPECTS:

Apply **Penex®** at 5 - 10L / Ha. Repeat as needed.

Do not use less than twice per year.

Compatibility

Always perform a compatibility test before mixing any products with **Penex®**.
